

Testimony

I am 41 years old and have worn makeup for over fifteen years primarily because of acne. I have tried products prescribed by the dermatologist as well as over the counter and have never received immediate or permanent results. I decided to visit an Esthetician in May 2005. I never wanted to reveal what my skin (which included dark spots, cysts and pimples) looked like underneath the makeup. After having a consultation with Jacqueline with regard to the benefits of a facial, I felt comfortable and convinced it was worth a try. Jacqueline impressed me with her knowledge of skin care and her willingness to help me get the best results. During my facial Jacqueline applied a bio-drying lotion to the various breakouts, and I saw immediate results.

As a result of my visit, I have purchased a Blemish Control Kit from Jacqueline for preventive care, and have decided to incorporate facials in my diet. I am 100% satisfied with the product and the facials. I can finally see what my skin looks like under the acne; after all it's been over fifteen years. My makeup can now be used as a beauty enhancer and not a concealer.

Thanks a Million,

Lori A. Mason
